

New Shaft Wrench Flats Now Available from Versa-Matic

Continuing our tradition of enhancing our product line with maintenance-friendly features, Versa-Matic now offers shaft wrench flats for use with the entire line of Elima-Matic® and Ultra-Matic pumps.

The wrench flats allow for even faster disassembly of the diaphragm plates from the shaft, making maintenance easy. They also prevent shaft damage and eliminate the need for special tools or disassembly methods.

Below is a list of all the shafts that will be affected, and the estimated availability dates of the corresponding wrench flats.
